

Analysis

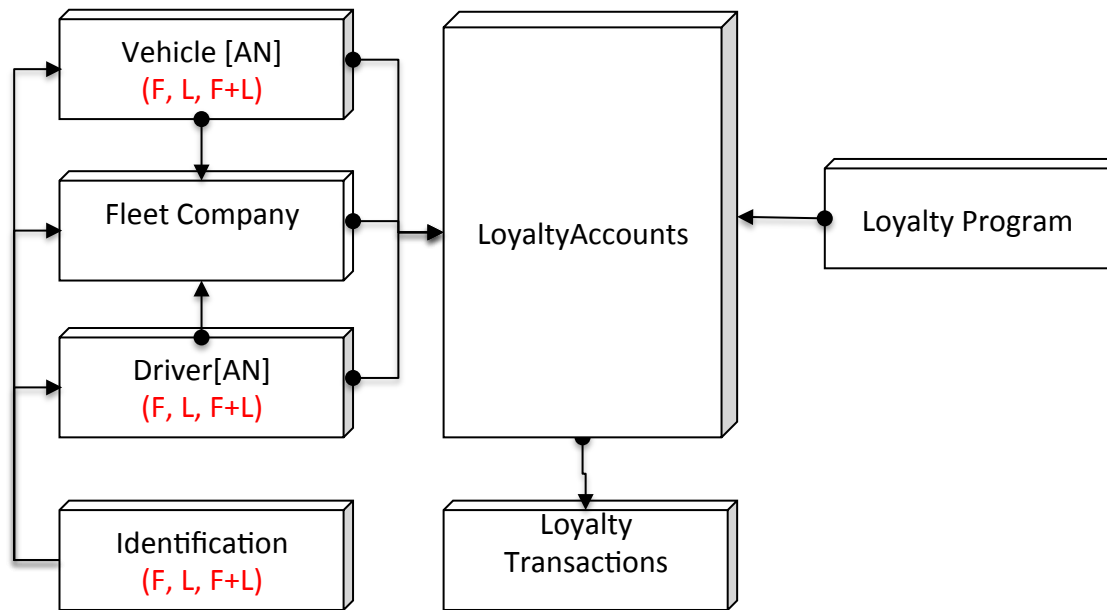

# LOYALTY MEMBERS

## Drivers [AN]

- Loyalty Members represented by their LoyaltyAccounts (equiv. to Fleet sub-accounts)
- When the Member is a Vehicle, it *must* have an associated Driver
- Driver/Vehicle relationship can be Fleet, Loyalty or Dual
- Idem for Identifications
- Drivers and Vehicles added for Loyalty only, will be linked by automatically to a generic fleet company maintained by the system for each subscriber

## Loyalty Member is a Fleet Company

- When the Loyalty Member is the Company:
- Loyalty Accounts can be:
  - Global: Points go to the Company
  - Individual: Points go to each Vehicle or Driver
- In this case, there is no need to add a Driver for a Vehicle Member.

- *Individual Loyalty sub-accounts not implemented in version 1.*
